PROFESSIONAL SUMMARY

Passionate front-end developer with real-world React + Vite experience building responsive, user-facing interfaces for dApps and consumer web apps. Strong foundation in HTML5, CSS3, modern JavaScript, and integrating frontends with APIs and blockchain off-chain libraries. Comfortable working in Agile teams and shipping accessible, maintainable UI.

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), HTML5, CSS3; familiar with Python, Java, C#.
- Frontend: React, Vite, component-based UI, responsive layout, state management.
- Tooling: Git, VS Code, Visual Studio, Vercel deployments.
- Blockchain / dApp frontends: Lucid / Coxygen.js integrations (off-chain to on-chain flows).
- Other: REST APIs, basic UX principles, debugging & browser devtools.

WORK EXPERIENCE

Junior Smart Contract Applications Developer

July 2024 - March 2026

Women In Moves Solution (WIMS) – Cardano Coxygen Global

- Built and shipped React frontends that integrate with Cardano off-chain libraries (Lucid / Coxygen.js), implementing user flows for auctions, bidding and wallet interactions.
- Implemented responsive layouts and authentication flows for consumer apps; focused on clear UX for transaction status & confirmations.
- Collaborated with backend and smart-contract teams to map UI actions to on-chain/off-chain flows and surface meaningful error states to users.

SELECTED PROJECTS

Streaming app (Netflix-style UI) – React + Vite

- Built movie browsing, authentication UI and video playback components with a modern responsive layout.

DineHub – Restaurant E-commerce and Reservation Platform – React + MongoDB + Cloudinary + Tailwindcss

- Developed an e-commerce web application that allows customers to browse and purchase restaurant products online.
- Integrated Stripe for secure online payments while providing an alternative option for customers to pay in person at the hotel

- Built a responsive and user-friendly interface for browsing products, completing orders, and managing reservations.

Cryptocurrency Market Dashboard – React + CoinGecko API + React Google Charts

- Built a clean, scalable component architecture using React 19 and Vite.
- Implemented global state management using React Context (CoinContext) for currency selection and coin data.
- Integrated live market data from the CoinGecko REST API with environment-based API key handling.
- Built interactive price history visualizations using react-google-charts.

EDUCATION

Bachelor of Science in Information Technology

Richfield Graduate Institute of Technology

Feb 2022 – Nov 2024

Relevant Coursework:

- Systems Design
- Software Engineering
- Web & Application Development
- Algorithms & Data Structures

Certificate in Full Stack Development

FNB App Academy

July 2025

Relevant Coursework:

- App Strategies
- UX Design Principles
- Backend & Frontend Development

Certificate in Haskell/Plutus

FNB App Academy

Feb 2026

Relevant Coursework:

- Functional Programming with Haskell
- Plutus Smart Contract Development
- UTxO & eUTxO Model (Cardano Architecture)
- Token Minting Policies
